March 1, 2022

Dear Colleagues,

Attached please find Part I – Undergraduate Programs – for the Academic Strategic Plan (ASP) work recently accomplished. The report includes my recommendations to the President about undergraduate programs which, in most cases, mirrors the recommendations of the ASP Committee. This task began in 2015 and hundreds of individuals have helped bring this task to fruition. Your dedication and talent in this task will help set the foundation for increased stability and, hopefully, an increasing enrollment of curious and excited undergraduate students. The first eight pages of this document articulate the context for this comprehensive review of academic programs at SUNY Brockport.

The next step in this process is to continue meetings with deans, chairs, and faculty from some departments to discuss the outcomes from this work. And I will continue to develop an implementation sequence for programs in the “growth” or “augmentation” category with a specific resource profile. This undergraduate resource profile will be provided to the President by late March and be followed by a similar resource profile for “growth” graduate programs in April. After the President’s consideration of both resource profiles, and with advice from the Cabinet, her decisions will be communicated to the campus.

The collective work to have these accomplishments occur is a testament to your hard work, care for this institution, and a willingness to look at an uncertain future with creative courage. Please contact me directly if you have questions or concerns about material in this report. Finally, invitations to visit with departments about this report are welcome given scheduling and time constraints.

Again, my professional admiration and gratitude for your work in examining SUNY Brockport’s future.

Linda M. Delene, Ph.D.
Interim Provost and Vice President of Academic Affairs
